Subject: FW: Aquaculture loss - sequestration

All,

During the Management team conference call this morning, I asked if there was any latitude in how the sequestration cuts related to aquaculture could be managed (e.g. spread across the Region). The question was elevated to APHIS BPAS. The response back was, "We have gone on record with a notification to Congress and whoever else that "APHIS would eliminate assistance to producers in 24 States in managing wildlife damage to the aquaculture industry, unless they provide funding to cover the costs." So, it is our opinion that however you manage that reduction, you need to make sure you are not contradicting what we said the impact would be."

I have been asked to provide a plan by Friday that will outline the implement of the \$263,000 aquaculture reduction. I will use the information you have already provided. If I need additional information, I will let you know.

Charlie
